

# Mission of Hope, Haiti

## GRACE HOUSE

### MISSION

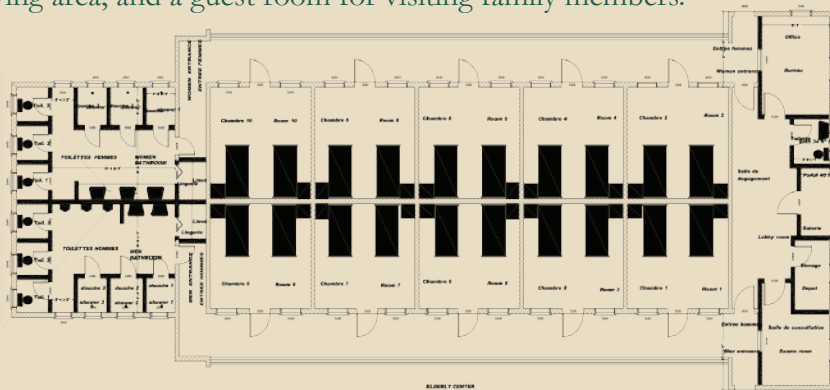

To strategically partner with Mission of Hope (MOH) by investing in the physical and spiritual care of elderly Haitians through the setup, construction and operations of the Grace House.

### PROBLEM

There is a severe lack of care provided for elderly Haitians. Some call this “the other side of orphan care,” in the sense that elderly are treated as abandoned orphans in their old age. There are very few assisted living facilities, and there is a profound need to care for the abandoned elderly.

### SOLUTION

In a strategic effort to address the need for elder care, the government of Haiti has asked Mission of Hope to help care for this demographic of hurting and abandoned people. Therefore, MOH is launching a “Grace House,” which is an assisted living facility providing medical, spiritual, and daily assisted care to elderly residents. The “Grace House” will have the capacity to serve up to 50 elderly residents, with facilities including a medical exam room, cafeteria, living quarters, a common living area, and a guest room for visiting family members.

## FINANCIAL SUMMARY

PHASE	TOTAL COST
Phase I: Complete Site Work and Excavation	\$30,000
Phase II: Construct Dorm Facility, Bathroom, and Showers	\$210,000
Phase III: Add Kitchen Area, With Commons Area and Outdoor Eating Area	\$75,000
Phase IV: Add Additional Facilities	TBD
Cost Estimate:	\$315,000
