

Friends,

I'm sending this letter to you because I've had the chance to be a part of some awesome things that God is doing in Haiti through the medical ministry at Mission of Hope, and I wanted to share it with you. I was blessed to get to spend a short time in Haiti and serve alongside this team and the experience was invaluable. I went to serve and share my skills with those in Haiti but I came back with so much more!

Behind the below numbers are individual people, children, moms and dads that I fell in love with. It's the one-to-one encounters and individual stories that will always keep Haiti in my heart. I feel blessed to play a part in the life transformation that is occurring across a nation. Not only is it healing thousands through medical care but it's also giving thousands a chance to find Hope in Jesus.

Here's what God's done in 2014 so far:

#### **Mobile Clinics:**

- 10 villages and 2 orphanages served (will return quarterly)
- 2815 patients treated
- 65 salvations
- 18,000 patients projected to be seen in 2014

#### **Clinic of Hope:**

- 1483 general consults
- 313 family planning consults
- 229 immunizations
- 257 hygiene kits distributed
- State-of-the-art ultrasound system added with 43 patients the first week
- X-ray imaging system to be added late 2014

#### **Community Health Program:**

- Implemented in January 2014 to bring life-saving health/wellness info to all villages we serve
- 38 trainings in 7 villages
- 1955 individuals taught
- 21 salvations
- Goal of 50,000 people taught in 2014

#### **Dental Program:**

- 175 patients seen
- Plans to open larger dental room in the new hospital later in 2014
- Goal to take mobile dental program into villages

#### **Vision Program:**

- 432 patients seen and given glasses
- Plans to open larger room and procure equipment to begin glaucoma and cataract surgeries
- Goal to take mobile vision screenings into the villages

#### **Prosthetics of Hope:**

- 150 patients served
- Increased opportunities to reach the handicapped community in more remote areas through relationship with Handicap International

As you can see from the numbers, there are many programs and all of these programs require both funding and personnel. I want to invite you to step into this in some way, because it's something that I think will be an absolute blessing to you. And I want this to have an impact on you like it has on me.

There are so many ways you can get involved and support what God is doing in Haiti. But here are a few ways that would really help us advance our care and ministry through medicine:

1. **GO** - Visit Mission of Hope in person: If you are interested in scheduling a medical trip of any kind, please contact Betsy at [betsy@mohhaiti.org](mailto:betsy@mohhaiti.org). Come serve and experience Haiti first hand!
2. **GIVE** - Financially support the ministry. We are praying for 40 people to give \$6,000 each so that we can keep meeting the medical needs of our area. <http://bit.ly/1nKB0bf>
3. **DONATE MEDS/SUPPLIES/EQUIPMENT** - Contributing medications or supplies is a huge blessing. If you are interested in donating anything to the medical program, please contact Barbara at [barbara@mohhaiti.org](mailto:barbara@mohhaiti.org).
4. **PRAY** - Becoming a prayer partner! This is a God-sized ministry and needs to be constantly covered in prayer. If you would like to receive monthly prayer requests and updates please contact Barbara at [barbara@mohhaiti.org](mailto:barbara@mohhaiti.org).

God bless and please let me know if you have any questions!
