

Mission of Hope, Haiti

NORTH CAMPUS KITCHEN

VISION

To strategically partner with Mission of Hope (MOH) in the construction of a kitchen at the North Campus in Bercy. The kitchen will be used in conjunction with the pastor training center, primarily serving pastors and educators for conferences in Haiti. It will also be used for visiting teams and partners housed at the MOH North Campus.

PROBLEM

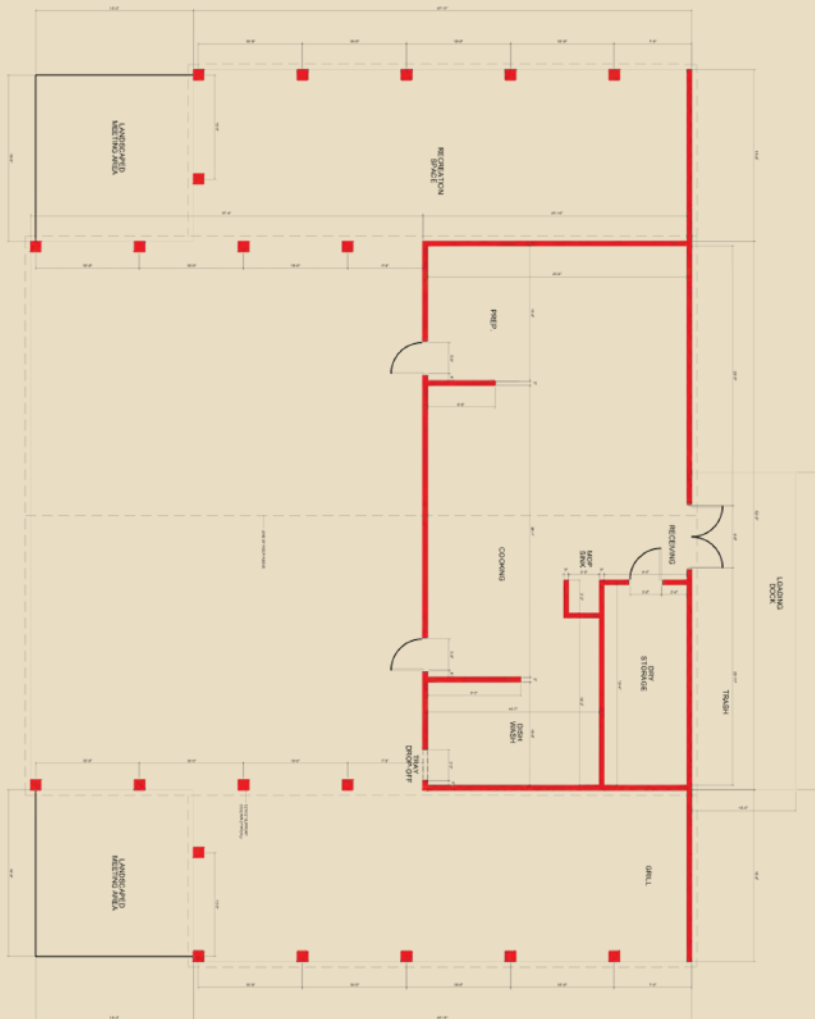

MOH is anticipating conference training of over 2,000 pastors at MOH in the 2014-2015 year, in addition to over 1,000 teachers, and roughly 2,000 mission team members who will be staying at the MOH North Campus. It is critical that MOH has the capacity to serve meals to conference participants and guests, and critical for the sustainability and long-term viability of this campus.

SOLUTION

MOH will leverage existing facilities including villa housing, dormitory housing, the agriculture training facility, the conference center, and the future cabanas to expand its ability to see life transformation in Haiti. By focusing on pastoral training and teacher training, we believe God can have a significant impact in the trajectory of a nation. By hosting teams serving alongside MOH in church advancement, we believe God will continue to use the North American church in partnership with the Haitian church to own the lostness and facilitate transformation on a village-to-village level. The kitchen is critical to enabling these facilities, and the aforementioned 3 key initiatives in seeing a nation transformed for Christ.

SITE DRAWING

TOTAL COST ESTIMATE

For a total estimated cost of \$80,000 MOH can complete the construction of North Campus kitchen, leveraging this gift in kind gifts of over \$50k in the construction and outfitting of the kitchen.
