

MISSION OF HOPE, HAITI

AGRICULTURE PROGRAM

FROM CROPS TO KIDS

MOH's successful child nutrition program has historically relied on food packed in the US and shipped to Haiti.

Two years ago, MOH hired agronomists to stimulate local farming to help meet part of the need.

WHAT LIFE TRANSFORMATION ARE WE SEEING?

We've purchased over 1.2 million meals in Haiti, creating new discipleship and job opportunities in farming and packaging.

The land is being physically redeemed and bearing more crops.

More children are being fed – over 70,000 students and orphans per day!

HOW CAN YOU HELP?

A small investment makes a major difference in the lives of Haitian farmers AND the children being fed....

\$10 - feeds an orphan for the month

\$100 - feeds a school for a day

\$1000 - feeds a school for two weeks

YES, I WOULD LIKE TO MAKE A DIFFERENCE FOR HAITIAN FARMERS AND SCHOOL CHILDREN!
